

Concurrent Programming

Pass Task 10: Less Common Synchronisation Problems

Overview

In a group, prepare a solution to one of the lesser known synchronisation problems. Prepare, and present your solution to the class.

Pass Task 10 — Submission Details and Assessment Criteria

You must submit the following files to Doubtfire:

- Your groups presentation
- Your problems source code (MyProblem.cs)
- Solution to one of the other groups problems (OtherProblem.cs)

Instructions

In groups (in class) come up with a solution to one of the less common problems.

- Prepare a presentation to give to the rest of the class
- Deliver your presentation (as a group, all must participate)

After the class, prepare your own implementation of your solution as well as the solution to one other group's problem.
